ANALYSIS MATHEMATICA

TOMUS 16 **1990**

CONTENTS — СОДЕРЖАНИЕ

Андриевский, В. В., Об одной теореме И. И. Привалова ..... 159—172
Artikis, T. and **Voudouri, A.**, Limiting behavior of certain mixtures of distributions ... 81—86
Castillo, E. and **Galambos, J.**, Bivariate distributions with Weibull conditionals ..... 3—9
Данченко, В. И., О рациональных составляющих мероморфных функций и их производных ..... 241—255
D'jachenko, M. I., Multiple trigonometric series with lexicographically monotone coefficients ..... 173—190
Dolzhenko, E. P. and **Makhmudov, Kh. M.**, On rational approximations of the functions of complex variable integrable over plane domains ..... 257—264
Georgiou, J. E. and **Mařik, J.**, On a class of orthogonal series ..... 11—25
Геворкян, Г. Г., О рядах по системе Франклина ..... 87—114
Harris, D. C., Sets of uniqueness and closed subgroups in Vilenkin groups ..... 115—122
Jain, P. K. and **Sinha, D. P.**, On Markuševič decompositions of Banach spaces ..... 265—275
Kirchoff, N., Nessel, R. J. and **van Wickeren, E.**, Quantitative condensation of singularities for convolution processes of Fejér-type ..... 191—201
Leindler, L., Sharpening of Stečkin's theorem to strong approximation ..... 27—38
Mikosch, T., Almost sure behavior of tail series in functional spaces ..... 123—133
Móricz, F., Integrability of double trigonometric series with special coefficients ..... 39—56
Osipenko, K. Yu., On the Lebesgue constants for interpolation of analytic functions .... 277—289
Пак, И. Н., Коэффициенты рядов Фурье и класс Липшица ..... 57—64
Rodin, V. A., The space BMO and strong means of Fourier series ..... 291—302
Schipp, F., On equivalence of rearrangements of the Haar system in dyadic Hardy and BMO spaces ..... 135—141
Skaskiv, O. B., On the Pólya conjecture concerning the maximum and minimum of the modulus of an entire function of finite order given by a lacunary power series ..... 143—157
Sorokin, V. N., Convergence of compatible Padé approximants to two dilogarithms ..... 203—214
Szalay, I., A high-indices theorem for strong Cesàro summability of double series ..... 65—80
Thangavelu, S., Summability of Laguerre expansions ..... 303—315
Vinogradova, G. A., On multipliers in weighted spaces ..... 215—226
Weisz, F., Martingale Hardy spaces, BMO and VMO spaces with nonlinearly ordered stochastic basis ..... 227—239
